PROJECTS

yummy-pizza-delivery React Application | <https://yummy-pizza-delivery.netlify.app/>

July 2023

- A pizza ordering application made using React.
- Used the concept of react routing which helps in browser URL to be changed and keeps the UI in sync with the URL.
- Used TailWind CSS for styling the application.
- Added Redux and advanced React router concept.

hotel-potala React Application | <https://hotel-potala.netlify.app>

September 2023

- Used React Router to achieve standard SPAs.
- Styled Components for writing component-scoped CSS, right inside JavaScript.
- React Query for managing remote state with features like caching, re-fetching, pre-fetching etc
- context API for UI state management
- React Hook Form for form management.
- other tools like React icons, React hot toast, date-fns.
- SupaBase used to easily create a back-end with a Postgres database
